

4th Annual

Customized Learning Summit

— creating the ideal learning experience —

July 7-8, 2016* - Spearfish, SD

*opening reception on the evening of the 6th

The ideal learning experience is founded in the transformational vision of learning presented in the much-acclaimed book *Inevitable*. Creating such learning experiences invests educators with reshaping pace, place, path and time for learners. Schools on this pathway empower and engage learners with approaches such as personalized learning, blended learning, customized learning and performance-based learning to give learners choice, voice, and ownership.

The rich slate of presentations highlights the journeys of learners, facilitators and leaders currently striving to create the ideal learning experience. By attending, participants will expand their knowledge, strategies, processes, resources, tools and professional network.

Registration opens March 1 • Space is limited
